

Idea : -(The Color for all must be Black, white, sky, yellow(preferably for buttons), red(preferably for transitions), also you can use other colors that will make it awesome. Also make sure it's a 3d website so use colors accordingly).

- 1. Landing Page(3d animation needed with some amazing pop-over. Page should be better and the page must have icons of coder, other coding apps or hacker in 3d some images may be. The color i want Black, white, sky. There must be a button in 3d with pop over named "Ready to Go" (with a 3d enter symbol) after clicking which it should render to the front page).**
- 2. Front page(It will appear after clicking the "Ready to Go" button, from the landing page. The Page design is given below. Keep the transitions smooth and a dark color, and I hope there should be some 3d icons in every page including header and Footer,**
 - Header(MERN Stack Developer/ Software Developer. About, Contact Me).**
 - Just after header there must be a page having My photo(The reactJs icon, Next JS icon, Node JS icon, Java icon, MongoDB icon, java Script icon, Tailwind css icon, all these icons must be rotating around the photo. In the left side of the photo there must be written "Hi I'm Biswojit Rout" and a very short description about my role must be within 2 to 3 lines. Again a quote must be written in this page).**
 - The next page after this must appear after scrolling the previous page(Here in this page there must be all the skills I have, and all these must have a smooth 3d action in it and a short description about the skills. The skills I have Node JS, React JS, next JS, Express JS, Mongo DB, Clerk, Convex, Java).**
 - This page must appear after scrolling the previous page(here it must have contain my projects. I have 3 projects till now).**
 - Now it's time for footer(It must have a smooth 3d animation of icons, It should contain a line "Thanks for exploring our website" and it should have links for my linkedin and github(The icons must be in the 3d)).).**
